

The Ultimate Lifetime Warranty Spray-On Roof System

DESIGNED FOR RVs, TRAILERS AND THE SPECIALTY VEHICLE MARKET

Built for the Road.

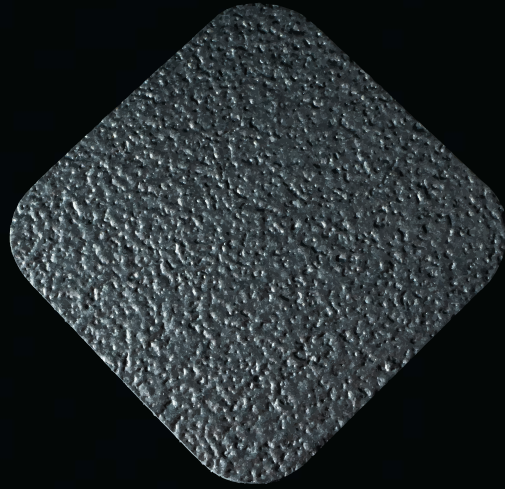

Engineered for the Future.

ApexArmor is the ultimate multi-purpose spray-on roofing system for RVs, Trailers, and The Specialty Vehicle Market. Offering unmatched protection, zero maintenance, and industry-leading heat rejection.

Forget rubber membranes, caulking, or costly repairs. With ApexArmor, you get a seamless, permanent roofing solution engineered to handle anything.

What Makes ApexArmor Different?

Original Decking Substrate

Additional Overlay - Increased Stability and Strength

ApexArmor Layer #1 - Bonding Layer

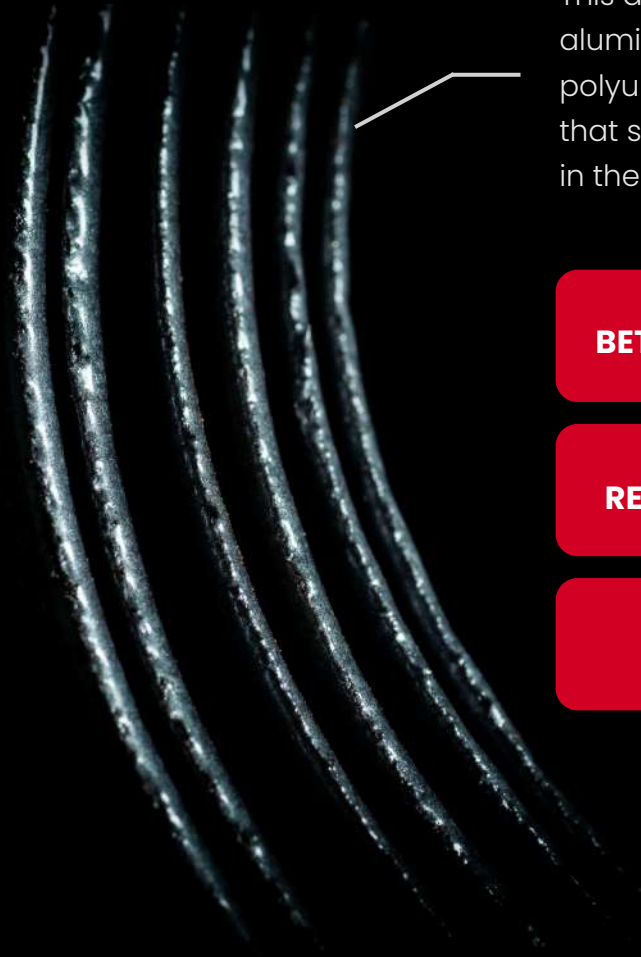

ApexArmor Layer #2 - Protection Layer

ApexArmor Layer #3 - Texture Coat

Best-in-Class Heat Reflection

Our integrated aluminized radiant barrier reflects solar heat away from the roof surface, reducing interior cabin temperatures by **up to 20% on hot days**. The goal is to reduce attic temperatures, allowing air conditioning systems to operate more efficiently.

This advanced formulation infuses aluminum pigmentation into the polyurea itself, creating a roof system that sets a new performance standard in the industry.

BETTER COMFORT WHILE CAMPING OR TRAVELING

REDUCED A/C USAGE AND IMPROVED EFFICIENCY

IMPROVED ENERGY EFFICIENCY OFF-GRID

Covers What Others Don't

Unlike traditional roof systems that skip slide-outs or treat them as afterthoughts, ApexArmor fully protects slide-out roofs with the same seamless, spray-on coverage and thermal protection as the main roof.

No more cracked seals, pooling water, or membrane shrinkage.

Other Vehicle Types Supported

Horse Trailers

Cargo Trailers

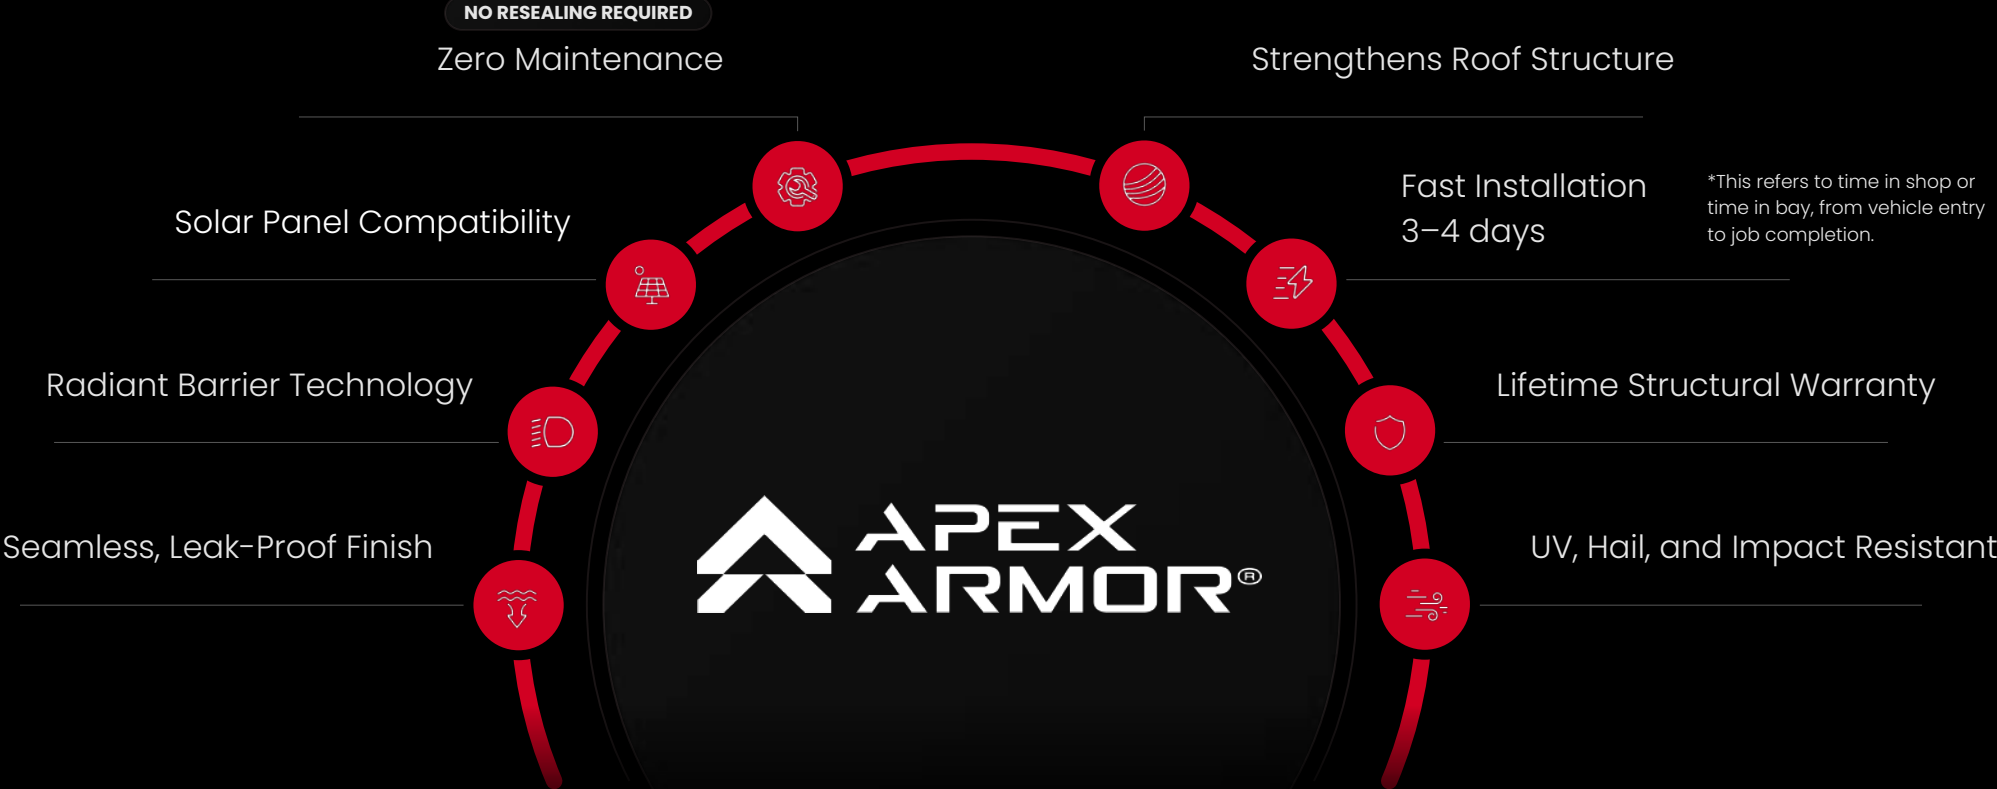

Toy Haulers
